A little smile—A little political but works for these times:

A British doctor says, “Medicine in my country is so advanced that we can take a kidney out of one man, put it in another man, and have him looking for work in weeks.”

A german doctor says: “That's nothing, we can take a lung out of one person, put it in another man, and have him looking for work in four weeks”

A Russian docter says: In my country medicine is so advanced, we can take half a heart out of one person, put in another man, and have both of them looking for work in two weeks.”

The American doctor, not to be outdone, says: “You guys are way behind, we just took a no brain out of New York, put him in the White House, and now half of the country is looking for work, and the other half is preparing for war.....
